Office Action Summary	Application No. 10/775,228	Applicant(s) KUNREUTHER, STEVEN	
	Examiner Scott A. Smith	Art Unit 3721	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 15-19, drawn to a handtag classified in class 206, subclass 389.
- II. Claims 5-8 and 20-27, drawn to a combination of a handtag and a severing means, classified in class 83, subclass 409.
- III. Claims 9-11, 13 and 14, drawn to a combination of a handtag and a means for attaching a fastener, classified in class 227, subclass 67.

Note: Although the combination claims are somewhat drafted in dependent form, they are considered to be independent claims for restriction purposes. To avoid any clarity problems, perhaps the claims should be rewritten in a more clear fashion.

The inventions are distinct, each from the other because of the following reasons:

Inventions of group I and group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the severing means could be utilized on a variety of handtags. The subcombination has separate utility such as for use without a severing means.

Inventions of group I and group III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the hollow needle attaching means could be utilized on a variety of handtags. The subcombination has separate utility such as for use without an attaching means.

Inventions of group II and group III are unrelated and/or distinct. Inventions are unrelated and/or distinct if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. The severing means of group II is set forth in group III. Further, the attaching means of group III is not set forth in group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott A. Smith whose telephone number is 571-272-4469. The examiner can normally be reached on 7:30-6:00 Tues.-Fri..
